

Tailored Lyophilization Solutions for Life Sciences

Leveraging over 60 years of lyophilization expertise to preserve the form, function, and efficacy of your ingredients and products.

Stability. Solubility. Scalability.

- ✓ Maximize your yield
- ✓ Optimize your cycle
- ✓ Minimize your time to market

Biopharma

Ensure the stability, shelf life and efficacy of small or large molecule ingredients, including live bacterial and viral strains in contained systems.

Medtech

Preserve the integrity and performance of medical devices and wound care and combination products.

Experience the LyoVantageSM

Our proprietary LyoVantage platform supports human and animal health with cycle development and clinical trial and commercial scale lyophilization to deliver a specific solution.

LyoLockTM Bulk Lyo

Preserve viability, potency, and biologic activity while maintaining structure, bioavailability, shelf stability, and consistent quality.

Technical Services

Discover cutting-edge solutions in formulation, cycle development and process and formulation optimization.

LyoPastilleTM

Use our patent-pending technology, utilizing innovative freezing, precision dosing and highly efficient lyophilization, to achieve new potential in product delivery.

Proprietary design for tailored solutions: We design, engineer, and fabricate our own lyophilization chambers and software for precise control specific to your projects.

- **Facilities capable up to ISO 5 / BSL-2:** Maintaining appropriate regulatory compliance, quality and safety standards for the needs of downstream applications
- **Proof of concept:** Maximizing ROI and yield for every unique client need

"OFD (Life Sciences) has always been a very collaborative and responsive partner, constantly pushing their service envelope with rigorous engineering."

DISTINGUISHED SCIENTIST
GLOBAL MEDICAL DEVICE COMPANY

We Lyo Out of the Vial

We know lyophilization is hard, but we make it easy—that's why so many organizations trust OFD Life Sciences with their most challenging product needs. **Learn why at www.ofdlifesciences.com.**
